Environmentally friendly flame retardant for textiles

You choose the fabric. We protect it.

Protected with FLS-Textile Not protected

For textile manufacturers, textile and furniture retailers, designers and interior designers

Your furniture fabrics and hanging textiles can now be protected from fire proliferation. The material can be treated with our environmentally friendly and effective flame retardant FLS-Textile. Tested and approved by SWEREA AB (RISE) in Sweden, meeting the European requirements for hanging textile: EN 1102, 2016 & furniture textiles: EN 1021, 1-2.

All our flame-retardants are pH neutral and non-toxic, certified eco-friendly by both the Swedish Environmental Institute (IVL) and the Australian UNSW (University of New South Wales).

Flame Security Sweden AB

Environmentally friendly flame retardant for textiles

You choose the fabric. We protect it.

About us
Flame Security Sweden AB started in 2012 and has developed and patented various types of environmentally friendly & effective flame-retardants for both offensive and defensive firefighting.

During 2018 we started a world-wide launch of our products through Flame Security International Pty Ltd based in Australia. Our flame-retardant products are being further developed in collaboration with UNSW research teams in Australia to further enhance quality & environmental friendliness, also undergoing fire and toxicity certification.

FLS-Textile is appropriate for textile manufacturers, textile and furniture retailers, designers and interior designers. We have been cooperating with IKEA for many years to carry out flame retardant treatment of fabrics for various uses. There is a great need worldwide for environmentally friendly and effective flame retardants and it is very inspiring to be at the forefront of this development.
