Green, environmentally friendly retardant for textiles

Your furniture fabrics and hanging textiles can now be protected from fire proliferation. The material can be treated with our environmentally friendly and effective flame retardant FLS-Textile. Tested and approved by SWEREA AB (RISE).

Treated textiles meet the following fire requirements:

• **EN 1102, 2016** for hanging textile.
• **EN 1021, 1-2** for furniture textiles with padding.

All our flame-retardants are pH neutral and non-toxic, certified eco-friendly by both the Swedish Environmental Institute (IVL) and the University of NSW (New South Wales) Australia.

For textile manufacturers, textile and furniture dealers, designers and interior designers, etc.

About us
We started our operations in Flame Security Sweden AB 2012 and have developed and patented green, eco-friendly and highly effective flame retardants for both offensive and defensive fire fighting.

In 2018, we started a global operation for our green flame retardants through the formation of our parent company Flame Security International Pty Ltd in Australia. The business is being developed further in close collaboration with University of NSW (New South Wales), focusing on quality, environmental friendliness & toxicology classification, a research project partially funded by the Australian government.

FSI Textile is very suitable for textile manufacturers, textile and furniture dealers, designers and interior designers, etc. We have collaborated with IKEA in Sweden for many years, but also in Holland to carry out flame retardant treatment of fabrics for different uses and areas. There is a great need worldwide for environmentally friendly and effective fire protection and it is very inspiring to be at the forefront of this development.

You choose the fabric, we protect it

FSI-Textile
• Environmentally friendly & toxicologically tested and approved.
• Treated textiles retain their colour and texture.
• FSI-Textile treated textiles should be dry cleaned.
• FSI-Textile is proudly produced in Fjällbacka, Sweden by VASCO AB.

Your place or ours?
• We perform flame retardant treatment of textiles at our premises in Stockholm.
• Large volumes of textiles are treated in controlled factory conditions.
• We also carry out smaller assignments at your place of business or your customers.

PROTECTED WITH FSI-TEXTILE

NOT PROTECTED
